Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows: this application must have been submitted during the pendency of the parent applications. Please remove the priority statement at the beginning of the specification.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the buttons as claimed in line two of claim 1 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement-drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an

Art Unit: 3711

application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Claims 12-16 are objected to because of the following informalities: claim 12 is depending on itself. Appropriate correction is required.

For purpose of examining the claims, it is assumed that claim 12 is to depend on claim 11.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Tudor (US Patent No. 5,256,119).

With regards to claim 1, Tudor discloses an apparatus comprising a forward foot-gripping element (38) including means for securing a forward foot (see column 3 lines 1-5 and Fig. 4), and a rear foot-gripping element including means for securing a rear foot (see column 3 lines 1-5 and Fig. 4).

Art Unit: 3711

With regards to claim 2, an adjustment mechanism for adjusting the distance between said forward and rear foot gripping elements (12 with 24 and 25).

With regards to claim 3, said adjustment means is comprised of two opposing attaching means (24 and 25).

With regards to claim 4, wherein said means for securing a forward foot is in the form of two opposing straps that is releasable and attachable to each other (see Fig. 4).

With regards to claim 5, wherein said means for securing a rear foot is in the form of two opposing straps that is releasable and attachable to each other (see Fig. 4).

With regards to claim 7, said forward foot-gripping element further comprises a base strap (the strap located at the bottom of the feet as shown on Fig. 4 is considered a base strap).

With regards to claim 8, said rear foot gripping element further comprises a base strap (the strap located at the bottom of the feet as shown on Fig. 4 is considered a base strap).

With regards to claim 9, wherein two opposing straps releasable attachable to each other are further attached to said base strap (38 and 40 as shown on Fig. 4).

With regards to claim 10, wherein said means for securing a rear foot is in the form of a base strap and an opposing strap being releasable attachable to each other, wherein said opposing strap is attached to said base strap (see Fig. 4).

With regards to claim 11, wherein an additional strap is attached to said means for attaching (12), wherein the additional strap further comprising a means for attachment (24 and 25).

Art Unit: 3711

With regards to claim 12, wherein the length of the additional strap is capable of being adjusted (column 2 lines 47-50).

With regards to claim 13, wherein the additional strap further comprises a means for attaching the additional strap to a person's leg (14).

With regards to claim 14, wherein the additional strap further comprises a means for attaching the additional strap to a person's leg (14).

Claims 1, 6, and 11-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Jackson (US Patent No. 4,706,987).

With regards to claim 1, Jackson discloses an apparatus comprising a forward foot gripping element (14) including means for securing a forward foot (52), and a rear foot-gripping element (18) including means for securing a rear foot (22).

With regards to claim 6, the strap is made of fabric (see column 3, line 30).

With regards to claim 11, wherein an additional strap (30 or 32) is attached to said means for attaching, wherein the additional strap further comprising a means for attachment (see Fig. 8).

With regards to claim 12, wherein the length of the additional strap is capable of being adjusted (see Figs. 7 and 8).

With regards to claims 13-16, wherein the additional strap further comprises a means for attaching the additional strap to a person's leg (the means for attaching the additional strap is 42 and 44 as shown on Fig. 8 and see Fig. 2 to see that the additional strap is attached to a person's leg).

Art Unit: 3711

With regards to claim 17, during normal use and operation of the Jackson's device, the method steps as claimed would inherently be performed.
